

HRC216PDU

Incorporating many Honda features at a competitive price, the HRC216 lawnmower is the professional contractor's perfect tool when looking for a hard-working machine.

INTRODUCTION

BUILT TO LAST

Built with the serious contractor in mind, the Honda HRC216PDU lawnmower incorporates plenty of features and benefits that commercial operators are after, and none of the unnecessary cosmetic 'extras' that some competitors offer.

The mower features a large, durable steel 21" cutting deck that's built to last but is lightweight enough to push around all day. Deck guards also extend along the sides to increase durability. What's more, the front bumper provides protection to the deck, as well as a convenient tie-down location. The front axles & the bumper together give added structural stability and durability.

DECADES OF HONDA TECHNOLOGY

The Honda HRC216PDU is powered by Honda's impressive Four-Stroke GSV160 commercial engine; the lightest engine in its class. Features include a cast iron cylinder sleeve, two-stage air filter, ball bearing supported crankshaft, electronic ignition and mechanical governor.

Of course, the GSV160 is a product of decades of Honda's technological advancements. Honda is the world's largest small engine manufacturer, and for good reason; every engine is built with durability and reliability at its core.

Because of this Advanced Four-Stroke Technology, the HRC216 will run powerfully and quietly, with minimal fuel consumption. That's not only a benefit to the person pushing it, but also to the environment and future generations.

88-LITRE CATCHER

One HRC216PDU feature that's impossible to miss is the whopping great big 88-litre catcher bag. Quite possibly the biggest push mower bag that Honda's ever offered in Australia, at that size you'll dramatically cut down (no pun intended) the amount of stops you'll make to empty the catcher.

What's more, the HRC216 features Honda's exclusive MicroCut® twin blade system. It offers you four cutting surfaces instead of two, resulting in ultra fine clippings for superior mulching and bagging with every mow.

Tiny pieces mean up to even more clippings in every monster bag – saving you time and money!

REINFORCED HANDLEBARS

Given it's a commercial machine, the HRC216PDU incorporates many high-quality parts as standard. One set of components that is sure to get a work out is the heavy-duty reinforced handlebars. Featuring larger diameter 1" tubing and better supports, the handlebar height can also be adjusted for user comfort and convenience.

The HRC216's cables are also heavy duty, sealed and adjustable for maximum performance and durability. The fuel valve can also be shut off manually for transport or storage, and provides maximum protection, even in the dustiest conditions. The outer foam can be repeatedly cleaned, which extends the life of the air filter.

They're little things, but they make the HRC216PDU the machine it is.

SPECS

SPECIFICATIONS

PRODUCT CODE	HRC216PDU
MOW SAFE TECHNOLOGY	Engine Brake
ENGINE	GSV160
ENGINE SPEC	OHV/OHC with cast iron Bore
START TYPE	Re-coil

AUTO CHOKE	No
SNORKEL	No
CHASSIS	Steel
CUTTING WIDTH	21" (533mm)
CUTTING HEIGHT ADJUSTMENT	4 Wheels
CUTTING HEIGHT RANGE	8 Stages
SELF PROPELLED	No
SPEEDS	
WHEEL DIAMETER	230mm
GRASS CATCHER	Yes
CATCHER CAPACITY	88 Litres
FUEL TYPE	Unleaded
FUEL TANK CAPACITY	1.1 Litres
MULCHING CAPABILITY	Yes
REAR DISCHARGE CAPABILITY	Yes
WASH PORT	No
RRP	\$1099.00
